The valve sealing system was checked in regard of fulfilment of the Tightness classes B of measured leakage rate $< 6,7 \cdot 10^{-5}$ mbar·l·s⁻¹ (stem seal) and $< 2,5 \cdot 10^{-5}$ mbar·l·s⁻¹ (body-plates seals, gaskets) for temperatures at the sealing system of -29°C to +40°C with C01 insulating valve endurance class. The total mechanical cycle was 500 cycles and the test medium was min. 99% purity helium by using a Helium Mass spectrometer.
